

Piastre d'usura per laminatoi *Liners and plates for rolling mills*

Liners manufactured to guarantee the highest life for customers.

Materials: C45 or 1.2083.

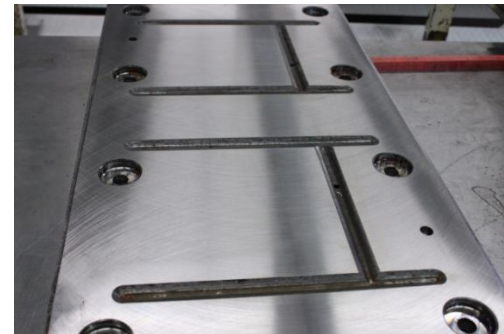

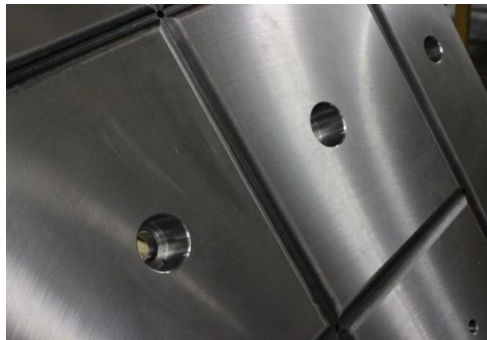

Treatments: induction hardening with up to 5 mm depth.

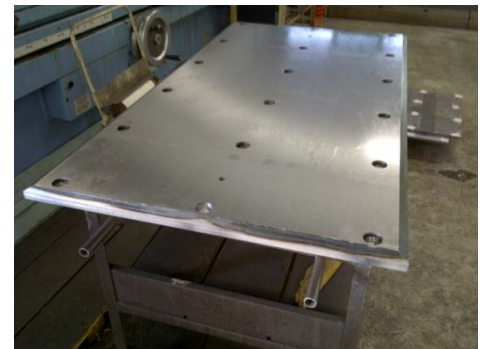

The treatment is carried out homogeneously on the whole surface with no interruptions, in order to guarantee maximum resistance and the best support to the stress due to impacts and sliding.

The bottom sides are kept soft enough not to damage the parts they are fixed on.
Hand straightened and checked one by one with laser machines by highly qualified people for a total respect of the flatness requested

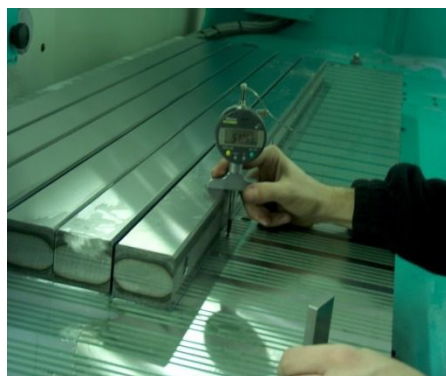

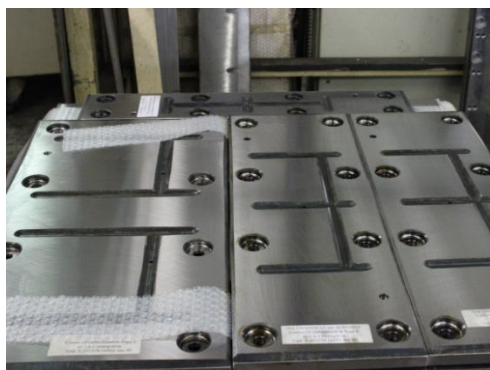

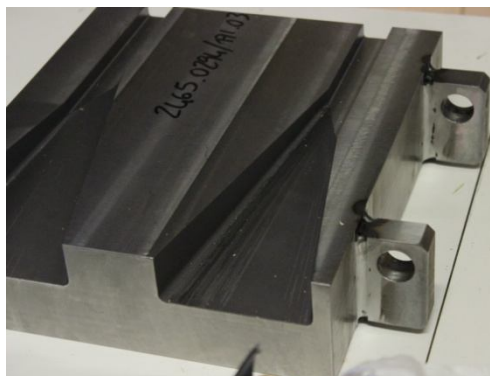

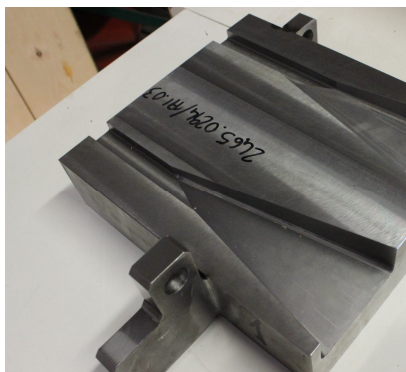

Liners can also be manufactured with other materials and special treatments according to customers' needs
